Hi Tad—

The spreadsheet I just sent over is going to be part of the material I leave with you tomorrow. I've spent a ton of time trying to reconcile it differently from what you'll see now. My reason for doing it was to check to see how much of logging proceeds really were being spent by the FB because, 1) there are a couple of points through the years where the SB set limits and 2) we already knew we were not seeing all the money from the timber sales.

We would be so much better if not even a single tree had been sold. In addition to this loss—if it's really true—we have no added recreational resources and we have 1500 acres of forest roads and trails that all need some type of repair and/or ongoing maintenance.

I will not share this with anyone but you and the T-Ts until we know for sure the numbers are true.

Bill
