---

Hi Bill, Largest concerns were exposure of taxpayers to responsibility to maintain/repair any damage to places where grant money is expended. Available FFB funds could be exhausted with one bad storm. Voters should weigh in. Other issue was in encouraging traffic increase in forest without any resources for search and rescue. Dan

Hello All—

Will someone please send this voter a copy of the document you were discussing Monday night? From what I could tell, it's one for the Trails grant, hasn't been read by the SB and has been submitted already?

And Dan, would you please tell me the language you were questioning? I tuned in toward the end of Lynne's part and heard all the rest of the discussion. Peter and Dan seemed to know what was in question, but it wasn't very clear to me what it was.

Tad, is this same topic on next Monday's agenda? If not already will you please add it?

Thanks,

Bill
